The Cost of Not Educating the World's Poor: The new economics of learning Lynn Ilon

In *The Cost of Not Educating the World's Poor*, Lynn Ilon observes from her 30 years of travel and work in some 20 developing countries, how global instability, problems of environmental degradation, spread of global disease, migration and political instability are a cost of viewing the uneducated poor as separated from a networked of fast-growing global knowledge. This book shows how powerful global learning systems are rapidly forming and linking the rich world with the world of the poor and developing nations. Using a narrative voice interleaved with concise introductions to the underlying theories (economics, development, learning, technology and networks) it shows us how changing our ways of thinking can lead to new possibilities. *The Cost of Not Educating the World's Poor* is based on an emerging theory of development economics and the author's own vast experiences and stories. It also discusses, among other issues:

- International development and how it has evolved toward an emphasis on knowledge
- How networked human capital creates new potential for poorly resourced countries
- The formation of a global system of learning networks
- The digitization of knowledge
- How nations improve their well-being through knowledge and equity

This inter-disciplinary assessment of international learning inequality and the methods to overcome it will appeal to researchers concerned with emerging concepts of global learning networks and their effects on development. It will also be of interest to students and policymakers studying national inequality, economics, and global development.

Robert Clark:

As a college student, I exactly feel bored in order to read. If their teacher asked them to go to the library or even make a summary for some e-book, they are complained. Just small students that have reading as an internal or real pastime. They just do what the teacher wants, like asked to go to the library. They go there but nothing reading very seriously. Any students feel that studying is not important, boring along with can't see colorful images on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we wish. Likewise, word says, ways to reach Chinese's country. So, this *The Cost of Not Educating the World's Poor: The new economics of learning* can make you sense more interested to read.
