A.I.: Artificial Intelligence. Even today, machines that mimic human thinking surround us. As the intellectual feats of computing machines grow more and more astounding, will there be a day when their apparent intelligence approaches, or even surpasses, that of human beings? And what if these machines then become conscious, self-aware?

In this latest title in the acclaimed *Future Chronicles* series of speculative fiction anthologies, thirteen authors confront the question of the Singularity: at and beyond that point of time when A.I. becomes more than simply a human construct. From first awareness to omniscience, these original short stories explore that territory where human intelligence comes face-to-face with what is either its greatest hope, or its greatest threat.

*The A.I. Chronicles* features stories by bestselling author David Simpson (the *Post-Human* series), Prix Aurora winner Julie Czerneda (*In the Company of Others*), Amazon Kindle Scout sensation Peter Cawdron (*Anomaly*) plus ten more of today's top authors in speculative and science fiction.
