Voyage Stephen Baxter

The space mission of a lifetime

An epic saga of America's might-have-been, *Voyage* is a powerful, sweeping novel of how, if President Kennedy had lived, we could have sent a manned mission to Mars in the 1980s. Imaginatively created from the true lives and real events., *Voyage* returns to the geniuses of NASA and the excitement of the Saturn rocket, and includes historical figures from Neil Armstrong to Ronald Reagan who are interwoven with unforgettable characters whose dreams mirror the promise of a young space program that held the world in thrall. There is: Dana, the Nazi camp survivor who achieves the dream of his hated masters; Gershon, the Vietnam fighter jock determined to be the first African-American to land on another planet; and Natalie York, the brilliant geologist/astronaut who risks a career and love for the chance to run her fingers through the soil of another world.
