Monopulse Principles and Techniques (Artech House Remote Sensing Library) Samuel M. Sherman, David K. Barton

Monopulse is a type of radar that sends additional information in the signal in order to avoid problems caused by rapid changes in signal strength. Monopulse is resistant to jamming which is one of the main reasons it is used in most radar systems today. This updated and expanded edition of an Artech House classic offers engineers a current and comprehensive treatment of monopulse radar principles, techniques, and applications. The second edition features two brand new chapters, covering monopulse countermeasures and counter-countermeasures and monopulse for airborne radar and homing seekers. This essential volume categorizes and describes the various forms of monopulse radar, and analyzes their capabilities and limitations. The book also devotes considerable space to monopulse circuits and hardware components, explaining their functions and performance. This practical resource features numerous photographs and illustrations drawn from actual radar systems and components. This book serves as a valuable reference for both experienced radar engineers and those new to the field.

From reader reviews:

Earnest Jennings:

Do you have favorite book? When you have, what is your favorite's book? Reserve is very important thing for us to be aware of everything in the world. Each e-book has different aim or perhaps goal; it means that book has different type. Some people feel enjoy to spend their a chance to read a book. They can be reading whatever they have because their hobby is actually reading a book. What about the person who don't like studying a book? Sometime, person feel need book after they found difficult problem or maybe exercise. Well, probably you will want this Monopulse Principles and Techniques (Artech House Remote Sensing Library).

David Hoag:

Book is to be different for each and every grade. Book for children till adult are different content. As we know that book is very important normally. The book Monopulse Principles and Techniques (Artech House Remote Sensing Library) seemed to be making you to know about other know-how and of course you can take more information. It is quite advantages for you. The book Monopulse Principles and Techniques (Artech House Remote Sensing Library) is not only giving you a lot more new information but also being your friend when you truly feel bored. You can spend your own personal spend time to read your e-book. Try to make relationship while using book Monopulse Principles and Techniques (Artech House Remote Sensing Library). You never feel lose out for everything should you read some books.

Nicholas Gober:

Would you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Try to pick one book that you just dont know the inside because don't assess book by its protect may doesn't work the following is difficult job because you are frightened that the inside maybe not as fantastic as in the outside search likes. Maybe you answer may be Monopulse Principles and Techniques (Artech House Remote Sensing Library) why because the excellent cover that make you consider concerning the content will not disappoint anyone. The inside or content is definitely fantastic as the outside or maybe cover. Your reading sixth sense will directly show you to pick up this book.

Christopher Melendez:

This Monopulse Principles and Techniques (Artech House Remote Sensing Library) is great book for you because the content which can be full of information for you who always deal with world and get to make decision every minute. That book reveal it facts accurately using great coordinate word or we can say no rambling sentences inside. So if you are read it hurriedly you can have whole info in it. Doesn't mean it only offers you straight forward sentences but challenging core information with beautiful delivering sentences. Having Monopulse Principles and Techniques (Artech House Remote Sensing Library) in your hand like getting the world in your arm, facts in it is not ridiculous one. We can say that no reserve that offer you

world with ten or fifteen small right but this reserve already do that. So , this is good reading book. Heya Mr. and Mrs. hectic do you still doubt which?
