Childhood Development: From Conception to 12 years old (Positive parenting) Joan Gomez

Every child is completely unique: an individual, developing at their own rate. In this fascinating and thorough investigation of the progression of a child's development, from conception to pre-teens Dr Joan Gomez shares with us the joys of being a parent and explains clearly and concisely why what is 'normal' development for one child is not necessarily standard for all. Chapters include an assessment of the common milestones and influences on development, at various stages of growth, such as: baby and toddlerhood, the pre-school years, brother and sisters, educational development and pre-adolescence. Practical appendices include reference charts to offer guidance for assessing: teething, sleep patterns, appropriate toys, timing of immunisation and the differences between boys' and girls' growth patterns.
