Human Information Interaction: An Ecological Approach to Information Behavior Raya Fidel

Human information interaction (HII) is an emerging area of study that investigates how people interact with information; its subfield human information behavior (HIB) is a flourishing, active discipline. Yet despite their obvious relevance to the design of information systems, these research areas have had almost no impact on systems design. One issue may be the contextual complexity of human interaction with information; another may be the difficulty in translating real-life and unstructured HII complexity into formal, linear structures necessary for systems design. In this book, Raya Fidel proposes a research approach that bridges the study of human information interaction and the design of information systems: cognitive work analysis (CWA). Developed by Jens Rasmussen and his colleagues, CWA embraces complexity and provides a conceptual framework and analytical tools that can harness it to create design requirements. CWA offers an ecological approach to design, analyzing the forces in the environment that shape human interaction with information. Fidel reviews research in HIB, focusing on its contribution to systems design, and then presents the CWA framework. She shows that CWA, with its ecological approach, can be used to overcome design challenges and lead to the development of effective systems. Researchers and designers who use CWA can increase the diversity of their analytical tools, providing them with an alternative approach when they plan research and design projects. The CWA framework enables a collaboration between design and HII that can create information systems tailored to fit human lives.

From reader reviews:

Alfred Cox:

Inside other case, little men and women like to read book Human Information Interaction: An Ecological Approach to Information Behavior. You can choose the best book if you'd prefer reading a book. So long as we know about how is important the book Human Information Interaction: An Ecological Approach to Information Behavior. You can add expertise and of course you can around the world by just a book. Absolutely right, since from book you can realize everything! From your country until foreign or abroad you will be known. About simple issue until wonderful thing it is possible to know that. In this era, we can easily open a book or searching by internet product. It is called e-book. You can utilize it when you feel uninterested to go to the library. Let's study.

Michelle Han:

Typically the book Human Information Interaction: An Ecological Approach to Information Behavior will bring you to definitely the new experience of reading a book. The author style to elucidate the idea is very unique. Should you try to find new book to see, this book very suitable to you. The book Human Information Interaction: An Ecological Approach to Information Behavior is much recommended to you to learn. You can also get the e-book from the official web site, so you can more readily to read the book.

Arthur Pineda:

The reason why? Because this Human Information Interaction: An Ecological Approach to Information Behavior is an unordinary book that the inside of the guide waiting for you to snap the idea but latter it will distress you with the secret the idea inside. Reading this book close to it was fantastic author who also write the book in such amazing way makes the content on the inside easier to understand, entertaining way but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This unique book will give you a lot of positive aspects than the other book get such as help improving your talent and your critical thinking technique. So , still want to hold off having that book? If I were being you I will go to the book store hurriedly.

Frank Foushee:

E-book is one of source of understanding. We can add our know-how from it. Not only for students but native or citizen will need book to know the change information of year to year. As we know those publications have many advantages. Beside we all add our knowledge, can also bring us to around the world. By book Human Information Interaction: An Ecological Approach to Information Behavior we can take more advantage. Don't one to be creative people? Being creative person must love to read a book. Only choose the best book that acceptable with your aim. Don't become doubt to change your life with this book Human Information Interaction: An Ecological Approach to Information Behavior. You can more attractive than now.
