Libraries are an integral part of the community, a fact that can often be overlooked in today's world of home-based online research. Passive programs encourage patrons to linger—either in the library or on the library's website—and promote a connection to the library's collections, its services, and the community.

Librarian's Guide to Passive Programming: Easy and Affordable Activities for All Ages presents plans for 32 passive programs designed to capture the attention of library patrons. Each chapter—which contains programs grouped thematically—details the steps necessary to reproduce the programs, and includes supporting handouts, activities, and photographs. This helpful guide also examines what passive programming is, why passive programming is relevant, and offers strategies across all aspects of its implementation—from developing program ideas to evaluating program success.
