Several Complex Variables and Banach Algebras: 35 (Graduate Texts in Mathematics) Herbert Alexander

Many connections have been found between the theory of analytic functions of one or more complex variables and the study of commutative Banach algebras. While function theory has often been employed to answer algebraic questions such as the existence of idempotents in a Banach algebra, concepts arising from the study of Banach algebras including the maximal ideal space, the Silov boundary, Geason parts, etc. have led to new questions and to new methods of proofs in function theory. This book is concerned with developing some of the principal applications of function theory in several complex variables to Banach algebras. The authors do not presuppose any knowledge of several complex variables on the part of the reader and all relevant material is developed within the text. Furthermore, the book deals with problems of uniform approximation on compact subsets of the space of n complex variables. The third edition of this book contains new material on; maximum modulus algebras and subharmonicity, the hull of a smooth curve, integral kernels, perturbations of the Stone-Weierstrass Theorem, boundaries of analytic varieties, polynomial hulls of sets over the circle, areas, and the topology of hulls. The authors have also included a new chapter containing commentaries on history and recent developments and an updated and expanded reading list.

From reader reviews:

Melinda Kendall:

The reason? Because this Several Complex Variables and Banach Algebras: 35 (Graduate Texts in Mathematics) is an unordinary book that the inside of the e-book waiting for you to snap it but latter it will zap you with the secret that inside. Reading this book next to it was fantastic author who have write the book in such amazing way makes the content inside easier to understand, entertaining technique but still convey the meaning totally. So , it is good for you for not hesitating having this ever again or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book have such as help improving your expertise and your critical thinking technique. So , still want to hold up having that book? If I ended up you I will go to the reserve store hurriedly.

Bernice Hicks:

Does one one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Try to pick one book that you just dont know the inside because don't determine book by its cover may doesn't work at this point is difficult job because you are frightened that the inside maybe not since fantastic as in the outside look likes. Maybe you answer is usually Several Complex Variables and Banach Algebras: 35 (Graduate Texts in Mathematics) why because the fantastic cover that make you consider with regards to the content will not disappoint you. The inside or content is definitely fantastic as the outside as well as cover. Your reading sixth sense will directly show you to pick up this book.

Luther Brown:

Is it you who having spare time subsequently spend it whole day by watching television programs or just lying down on the bed? Do you need something totally new? This Several Complex Variables and Banach Algebras: 35 (Graduate Texts in Mathematics) can be the answer, oh how comes? The new book you know. You are therefore out of date, spending your extra time by reading in this fresh era is common not a nerd activity. So what these textbooks have than the others?

Antonio Ritchie:

Book is one of source of expertise. We can add our know-how from it. Not only for students but in addition native or citizen need book to know the upgrade information of year for you to year. As we know those guides have many advantages. Beside many of us add our knowledge, may also bring us to around the world. With the book Several Complex Variables and Banach Algebras: 35 (Graduate Texts in Mathematics) we can consider more advantage. Don't that you be creative people? To get creative person must choose to read a book. Simply choose the best book that ideal with your aim. Don't become doubt to change your life at this time book Several Complex Variables and Banach Algebras: 35 (Graduate Texts in Mathematics). You can more pleasing than now.
