Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses) Cilli Sobiech

This thesis constitutes an extraordinary innovative research approach in transferring the concepts and methods of complex systems to risk research. It ambitiously bridges the barriers between theoretical, empirical and methodical research work and integrates these fields into one comprehensive approach of dealing with uncertainty in socio-ecological systems. The developed agent-based simulation aims at the dynamics of social vulnerability in the considered system of the German North Sea Coast. Thus, the social simulation provides an analytical method to explore the individual, relational, and spatial aspects leading to dynamics of vulnerability in society. Combining complexity science and risk research by the method of agent-based simulation hereby emphasizes the importance of understanding interrelations inside the system for the system's development, i.e. for the evolving. Based on a vulnerability assessment regarding vulnerability characteristics, present risk behavior and self-protection preferences of private households against the impacts of flooding and storm surges, possible system trajectories could be explored by means of simulation experiments. The system-analytical approach therefore contributes to an integrated consideration of multi-dimensional and context-sensitive social phenomena such as vulnerability. Furthermore it achieves conceptually and strategically relevant implications for risk research and complex systems research.

From reader reviews:

Lori Leavitt:

Nowadays reading books become more than want or need but also turn into a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book which improve your knowledge and information. The info you get based on what kind of publication you read, if you want have more knowledge just go with schooling books but if you want experience happy read one together with theme for entertaining for example comic or novel. The particular Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses) is kind of e-book which is giving the reader erratic experience.

Bobby Gonsalves:

Often the book Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses) will bring someone to the new experience of reading a new book. The author style to clarify the idea is very unique. Should you try to find new book to see, this book very suited to you. The book Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses) is much recommended to you to read. You can also get the e-book from the official web site, so you can quickly to read the book.

Kirk Qualls:

Do you have something that that suits you such as book? The e-book lovers usually prefer to select book like comic, limited story and the biggest an example may be novel. Now, why not striving Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses) that give your pleasure preference will be satisfied through reading this book. Reading habit all over the world can be said as the means for people to know world considerably better then how they react towards the world. It can't be mentioned constantly that reading behavior only for the geeky man but for all of you who wants to always be success person. So , for all you who want to start reading as your good habit, you could pick Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses) become your current starter.

Gerard Armstrong:

Does one one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Try to pick one book that you just dont know the inside because don't determine book by its protect may doesn't work at this point is difficult job because you are frightened that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer could be Agent-Based Simulation of Vulnerability Dynamics: A Case Study of the German North Sea Coast (Springer Theses) why because the wonderful cover that make you consider regarding the content will not disappoint a person. The inside or content is definitely fantastic as the outside or maybe cover. Your reading sixth sense will directly make suggestions to pick up this book.
